RE: MINED LAND RECLAMATION ACT 40-8

Gentlemen:

Enclosed is our submittal for our Mine Reclamation Plan. It includes two maps. One shows the present operations, future operations, waste disposal area, plant site, and past production area. The other map is a land map designating ownership of land.

Included within the boundaries of the Utelite holdings is the Summit County Landfill. This landfill is adjacent and within a few hundred feet of the present operation.

It has been brought to the attention of Utelite through publications and other sources that an abandoned open pit can be an asset for landfill disposal areas. Utelite is taking steps to initiate the necessary work that has to be done to make this a feasible project. Utelite will keep the Division informed of the progress being made.

The reclamation and revegetation of the waste area is planned on being done this fall. The reclamation of the plant site is explained in the report. It includes reclamation of the plant area but does not include revegetation as it will be covered with landfill.

This report and plan have been completed by Eldred M. Garrick, President of Mineral Services, Inc. Any additional data or changes you may have please contact either Mr. Garrick at 973-8865 or Carsten Mortensen at 359-8541.

Utelite is submitting their mining plan in compliance with Form MR-1.

Sincerely,

Carsten N. Mortensen

UTELITE CORP.
